QUALITY ASSURANCE & WARRANTY LETTER

OEM Manufacturing Services — Small Home Appliance Products

To Whom It May Concern / Dear Valued Customer,

Guangdong Shihao Intelligent Technology Co., Ltd. (hereinafter "the Company"), through its Service Department, hereby issues this Quality Assurance & Warranty Letter as the quality commitments, warranty terms, and after-sales obligations applicable to all OEM-manufactured products supplied by the Company to its customers.

1. Product Warranty Coverage

The Company warrants that all products manufactured and supplied under OEM production agreements shall be free from manufacturing defects, and commits to the following warranty periods:

Component / Scope	Warranty Period
Complete Unit	1 year from date of delivery
Core Components — Motor & Circuit Board	2 years from date of delivery
Consumable Parts — & Activated Carbon	Excluded from warranty (consumable items)
Exhaust Fan Assembly	1 year (treated as removable/replaceable component)
Warranty Reference Basis	From date of mass goods arrival at port (12 months); if purchase date unknown, 14 months from manufacturing date

Note: Consumable parts such as the activated carbon filter are explicitly excluded from the warranty scope.

2. After-Sales Service (A/S) Commitments

The Company commits to providing comprehensive after-sales support for all OEM products throughout the warranty period and beyond, including:

- Supplying replacement parts within 20–40 business days of a customer request, subject to parts availability; if procurement time exceeds 10 days, the delivery schedule will be mutually agreed.
- Providing 0.1% Free of Charge (FOC) components with each shipment as a service provision.
- Conducting quarterly quality review meetings (A/S Strategy Meetings) to assess product quality and implement continuous improvement as the customer requests.

3. Defect & Failure Handling Policy

The Company maintains a strict defect response protocol to ensure product reliability and customer satisfaction:

- The machine is covered by a one-year warranty. The failure rate in the first year is no more than 2%. If the failure rate in the first year exceeds 2%, the manufacturer will replace the entire machine free of charge as compensation.
- If a defect rate for the same component reaches or exceeds 2% during the warranty period, the Company shall supply replacement parts within 20–50 days and take corrective action to prevent recurrence.
- If a concentrated (batch) defect rate of the same nature reaches or exceeds 3% after delivery, the Company shall replace the entire affected batch with corrected products at its own cost.
- In the event of manufacturing defects resulting in damage to end-consumers, the Company shall indemnify the customer for all associated costs that cannot be recovered through applicable product liability laws.
- Upon discovery of any quality issue, the Company shall immediately notify the customer, analyze root causes within 10 days, and submit a corrective action report with updated drawings and improved components.

4. Quality Management System

To maintain consistent product quality throughout the production process, the Company commits to the following:

- Designating a dedicated quality inspection department and quality assurance manager for each product line.
- Every new batch's Strict Quality Assurance Testing in high/low-temperature testing chamber, torque meter, spring impact hammer, multi-channel temperature tester, test finger, vibration tester, tilt tester, salt spray tester, burst tester, colorimeter, light box tester, and constant temperature/humidity testing chamber.
- Calibrating production equipment, tools, and measuring instruments regularly to maintain production accuracy.
- Conducting self-inspection of any inventory stored for over 6 months before requesting import/customs inspection.
- Notifying the customer immediately of any changes to product specifications, materials, production methods, or component suppliers that may affect product performance.
- Submitting initial product samples to the customer for approval before commencing mass production whenever tooling, specifications, or production is significantly altered.

5. Intellectual Property & Design Rights

All product appearance and structural designs developed for or commissioned by the customer are recognized as belonging exclusively to the customer. The Company confirms that it shall not manufacture, sell, or distribute products utilizing the customer's proprietary design rights — during the contract period or after its expiration — without the customer's prior written consent.

The Company grants the customer a license to use all relevant patents, utility models, and design rights held by the Company that are associated with the contracted products for the duration of the contract.
